

**IBC**<sup>®</sup>LONGWALK

The IDC®LONGWALK dog harness is the first joint-friendly Y-harness, designed as the ideal accessory for longer walks and leisurely excursions with your pet.

“We wanted to develop a real leisure harness for dogs, so that when you go out for a long walk or outing, as well as putting on hiking boots for your own health and comfort, you can also provide a similar type of care for your dog’s health and comfort ...”

– says Gyula Julius Sebő, founder and CEO of JULIUS-K9

Scientific research has shown that when walking a dog on a leash, the dog’s body, as well as the body of the person walking the dog, can be subjected to thousands of vibrations through the harness and the leash. Over time, these micro-vibrations can have a detrimental effect on the joints of both the dog and the owner.

The Duo-Flex® micro-vibration absorbing system incorporated into the IDC®LONGWALK dog harness has been designed to dampen these vibrations, tugs and jolts, lessening their impact on the dog and on the person. The Duo-Flex® system protects the joints when the leash tightens, and at other times of stress, such as when you release your dog to run off the leash.

Specially designed features of the Duo-Flex® system ensure that, depending on the load, the elastic elements come into operation gradually and in a coordinated manner. The elastic elements of the IDC®LONGWALK dog harness continually react to every step that the dog takes, protecting the joints in every situation.

- Duo-Flex® micro-vibration absorbing system
- Adjustable and openable straps - the harness can be put on and taken off without the need to pull it over the dog's legs.
- Chest pad openable by hook and loop fastener - the harness can be precisely adjusted to the body structure and size of the dog
- Neoprene lining and special inner stiffener combine to make the harness perfectly form-fitting and to ensure that it keeps its shape
- Bag and flashlight attachment options
- Reflective and phosphorescent elements to enhance visibility
- Super-grip handle ensuring a secure grip
- Interchangeable custom patches
- Red Dot Award-winning design and colour scheme
